## KOKANEE CUT PLUG

The Brad's Super Bait® Series Kokanee Cut Plug is a rotating bait holding lure that resembles a wounded bait fish. It can be used trolling, back bouncing, and casting. The Brad's Kokanee Cut Plug can be setup in many ways to be an effective fish catching lure! You may find more ways than listed here. These lures open the door for creative fishing!

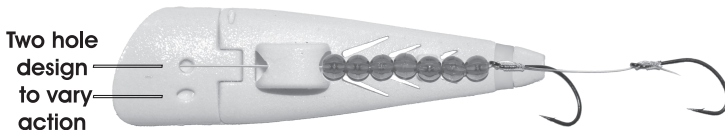

**Baiting:** The type of bait used may vary depending on the species of fish being pursued. Fill the cavity with your favorite scent or chopped bait- this is where you can be creative mixing your own secret Kokanee Cut Plug recipe. Be careful not to overfill the cavity. Then tip your hooks with your favorite Kokanee or Trout bait.

**Rigging:** Leader lengths range from 12"-36" back from the dodger, with the most common length between 18"-24" back from your dodger. Because the Kokanee Cut Plug creates its own action, there is no need for transferred action from the dodger to the lure. However, a shorter leader length will create a more erratic action on the lure, a longer leader length will make the action less erratic.

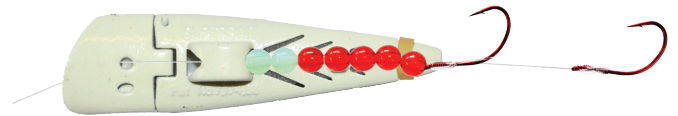

**Hooks:** Size #4 red or pink octopus hooks recommended for double hook riggings, size #10 recommend for treble hooks

**Beads:** Size 4-6 mm recommended for beads

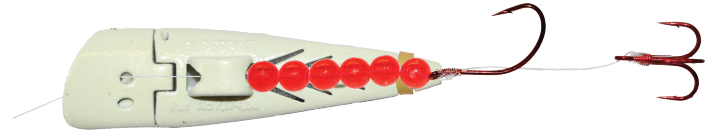

**Leader Holes:** Use the center hole for a slower lure spin and more wobble rolling action, use the left hole for a faster lure spin and tighter wobble rolling action.

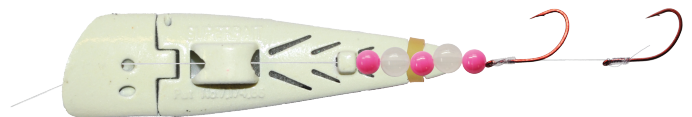

Double Octopus with 2 Glow Beads

Octopus Hook with Treble Stinger

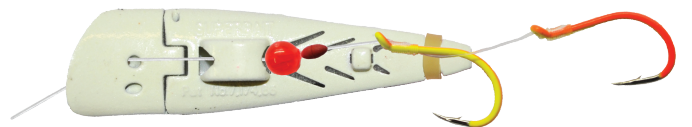

5 Beads with Line through Leader Guide

3 Beads with Line under the Band

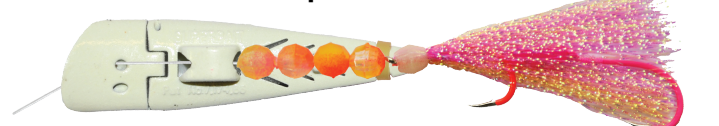

Double Octopus with Bobber Stop

Double Octopus with Hoochie

Double Octopus with Twinkle Skirt
